

Create IBM Watson IoT Platform and Device

Date	25 October 2022
Team ID	PNT2022TMID04717
Project Name	IoT Based Safety Gadget for Child Safety Monitoring and Notification

Device step 1 – Login into your cloud account

Step 2 – Dashboard

Step 3- Resource list

The screenshot shows the IBM Cloud console's 'Resource list' page. The top navigation bar includes the IBM Cloud logo, a search bar, and links to 'Catalog' and 'Manage'. The user's name 'SANJITH KUMAR S's A...' is visible. The left sidebar contains various icons for navigation. The main content area displays a table of resources with columns: Name, Group, Location, Product, Status, and Tags. A 'Create resource' button is in the top right. The 'Internet of Things' category is expanded, showing 'Internet of Things Platform-g9' as an active resource in the 'Default' group, located in 'London'.

Name	Group	Location	Product	Status	Tags
Internet of Things Platform-g9	Default	London	Internet of Things Platform	Active	-

Step 4- IoT platform

The screenshot shows the 'Let's get started with IBM Watson IoT Platform' page. It features a central graphic of a device connected to a cloud. The page includes a 'Launch' button and a 'Docs' button. Below this, a section titled 'Ready for the next level?' introduces the 'IBM Watson IoT Platform Journey' with three stages: Lite, Non-Production, and Production. Each stage has a description and a 'Launch' button. The 'Lite' stage is currently selected.

Let's get started with IBM Watson IoT Platform

Securely connect, control, and manage devices. Quickly build IoT applications that analyze data from the physical world.

Ready for the next level?

IBM Watson IoT Platform Journey

- Lite**
The Lite service plan provides a lightweight development environment to get you started with the connectivity capabilities of Watson IoT Platform.
- Non-Production**
The Non-Production service plan is a full-featured, fully-integrated offering that enables you to explore Watson IoT Platform to see how the service can fit into your IoT environment.
- Production**
The Production service is a fully managed SaaS offering that enables you to manage and analyze enterprise IoT data.

Step 5- IoT Watson Platform

Step 6- Create devices

The screenshot shows the 'Browse' page of the IBM Watson IoT Platform. The page displays a table of devices with columns for Device ID, Status, Device Type, Class ID, Date Added, and Descriptive Location. A single device is listed with ID '12344321', status 'Disconnected', and type 'IoT'. Below the table, there is a section for 'Device Information' showing details for the selected device.

Device ID	Status	Device Type	Class ID	Date Added	Descriptive Location
12344321	Disconnected	IoT	Device	Oct 17, 2022 2:27 PM
